

We are looking for a

## Lead Software Architect (f/m) – fulltime in Vienna (asap)

### About us

opvizor® is the leading Software-as-a-Service platform/community for predictive analysis and issue prevention in virtualized IT. It detects issues that affect IT infrastructure before they cause instability and lack of performance. Opvizor provides a daily repeating full system health check and solves about 60% of recurring support problems in advance. For Details see [www.opvizor.com](http://www.opvizor.com)

### Job description

You work closely together with the executives of R&D, as well as internal and external Software Engineers to ensure the software written today becomes the building blocks of tomorrow's solutions of opvizor. Your focus is on designing and structuring our future applications. The task requires a wide degree of creativity and independent judgment - relying on extensive experience - to accomplish our objectives.

### Responsibilities. You...

- ❑ ...set long-term architectural strategies that act as roadmaps for future development.
- ❑ ...provide input to Product Management for the Vision/Scope Documents.
- ❑ ... define how the products will adhere to existing strategies, standards, and guidelines.
- ❑ ...work with lead engineers to create functional specifications and implementation designs.
- ❑ ...participate in the development of technical specifications, driving any new technologies.
- ❑ ...previews new ideas and technologies and examine their usefulness to the company's goals.
- ❑ ...work collaboratively with QA to ensure development standards.
- ❑ ...are able to work independently and manage time effectively
- ❑ ...work with a mixed team in different locations
- ❑ ...are able to direct others through team leadership, project leadership or 1-on-1 mentoring.
- ❑ ... are effectively communicating to both a non-technical and technical audience at all levels in the organization.

LEO - The happy IT administrator using opvizor

## Your Skills

- ❑ 3+ years experience as senior developer/tech lead in the area of Enterprise applications
- ❑ Two or more years experience as a development lead or manager with experience specifying the software architecture for at least one product that completed the development process.
- ❑ Java, REST, Hibernate, GWT
- ❑ Database experience (NoSQL, relational databases, in-memory-databases) in architecture and design
- ❑ Programming to external CLI and API, as well as product internal API
- ❑ Practical daily experience with wide area of operating systems. Good knowledge of recent Windows and Linux OS
- ❑ VMware knowledge is very helpful
- ❑ Storage Array (EMC, NetApp etc. ) knowledge is helpful

## We offer

We can offer you all the benefits of a young, fast-growing company: constant change, a multinational and dynamic team, efficient processes and structures, a lot of scope for personal initiative... Our achievements and excellence in what we do not only make us proud, but excite us too!

Would you like to join us? Then we look forward to receiving your application – email applications are welcome. Please send your application documents, including details on your salary expectations and starting date.
